SAIKIRAN SOMANAGOUDAR

Chicago, IL | 312-918-1798 | saikiransomanagoudar@gmail.com | LinkedIn | GitHub | saikiransomanagoudar.com

EDUCATION

Illinois Institute of Technology, Chicago, IL, USA — August 2023 – August 2025
Master's in Computer Science

Reva University, Bengaluru, KA, India — July 2015 – August 2019
Bachelor's in Computer Science and Engineering

SKILLS

- **Languages:** Python, JavaScript, TypeScript, Java
- **Web & Styling:** React, Next.js, Redux, HTML, CSS, Tailwind CSS
- **Databases / Data:** SQL, MySQL, PostgreSQL, MongoDB, XML, JSON
- **Machine Learning Libraries:** Pandas, NumPy, NLTK, Matplotlib
- **Back-End & Cloud:** Flask, FastAPI, AWS, Kubernetes, Jenkins, Maven
- **AI & Dev Tools:** LangChain, Git, Jest, Docker, JIRA

WORK EXPERIENCE

Software Engineer Fellow — July 2024 - September 2024
CROWDDOING, Chicago, IL, USA

- Developed new interactive UI components and features for the AIME/Imagination Project web application using React, creating reusable component libraries that improved team workflow efficiency by 30%
- Built responsive data visualization dashboards integrating Django backend APIs, implementing efficient state management and data fetching that reduced rendering time by 40% and enhanced user experience
- Enhanced application performance by 25% through frontend optimization techniques including code splitting, lazy loading, and component rendering improvements while implementing automated testing pipelines and Docker-based CI/CD processes to ensure consistent quality standards

Senior Software Engineer — August 2022 - June 2023
WIPRO TECHNOLOGIES, Bengaluru, KA, India

- Spearheaded migration of **30+** client-facing web applications to AWS hybrid cloud, with strong focus on responsive design and UI performance, **reducing system downtime by 25%**
- Standardized disaster recovery protocols for critical UI components and led gap analyses with cross-functional teams to ensure **90% application functionality post-migration**
- Enhanced cloud resource allocation for frontend assets and dynamic content, **cutting operational costs by 20%** while maintaining rigorous performance benchmarks
- Automated deployment workflows for web applications on AWS, **curtailing manual intervention by 50%** and ensuring reliable, rapid releases

Software Engineer — September 2019 - August 2022
WIPRO TECHNOLOGIES, Bengaluru, KA, India

- Implemented interactive UI components using modern frontend framework Next.js with React library to upgrade user engagement and streamline navigation, **decreasing page load times by 15%**
- Engineered the UI/UX of client-facing React web applications, improving component rendering efficiency, responsiveness, and **increased user session duration by 20% and mitigated bounce rates by 15%**

PROJECTS

GIF Enigma | *React.js, TypeScript, Redis DB, Giphy API, Gemini-2.5-Flash-Lite* – GitHub | r/PlayGIFEnigma — March 2025 – April 2025

- Engineered Reddit-native game achieving **143K+ views** and **1.2K daily users**, demonstrating proficiency in building scalable applications with clean, well-documented TypeScript code following modern software engineering practices
- Designed dual-mode gameplay architecture with real-time leaderboards using Redis, applying data structure optimization and efficient algorithms for state management in interactive, data-intensive applications
- Integrated Gemini AI for intelligent word generation and hints, leveraging AI-driven insights to enhance user experience and automate workflows, showcasing ability to incorporate AI into problem-solving processes

Smart Homes | *React.js, Java, Jakarta EE, Python, Java Servlets, MySQL, MongoDB* – GitHub — August 2024 – September 2024

- Designed a full-stack e-commerce platform with multi-role access (StoreManager, Customer, Salesmen) using Java Servlets and React.js, supporting product, order, account and cart workflows
- Developed customer service and recommendation modules by integrating OpenAI GPT-4o via LangChain and Python Flask APIs, enabling semantic product search and automated ticket triaging with image/text input

Smart Retail Bookstore | *Flutter, LangGraph, FastAPI, Dart, Python, GraphQL, PostgreSQL* – GitHub — September 2024

- Built a full-stack web application through Flutter and FastAPI for personalized book recommendations
- Integrated a **multi-agent chatbot** to improve user support and automate order processing, and recommendations
