

SAIKIRAN SOMANAGOUTAR

Chicago, IL | 312-918-1798 | saikiransomanagoudar@gmail.com | [LinkedIn](#) | [GitHub](#) | saikiransomanagoudar.com

EDUCATION

Illinois Institute of Technology, Chicago, IL, USA

August 2023 – August 2025

Master's in Computer Science

Reva University, Bengaluru, KA, India

July 2015 – August 2019

Bachelor's in Computer Science and Engineering

SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java
- **Web & Frameworks:** React, Next.js, Node.js, Redux, HTML, CSS, Tailwind CSS
- **Testing & Performance:** Jest, React Testing Library, Code splitting, Lazy loading, SSR
- **Databases / Data:** SQL, MySQL, PostgreSQL, MongoDB, XML, JSON
- **Back-End & Cloud:** Flask, FastAPI, AWS, Kubernetes, Jenkins, Docker, Maven
- **AI & Dev Tools:** LangChain, Git, JIRA, Agile/Scrum, CI/CD

WORK EXPERIENCE

Software Engineering AI Trainer

April 2026 – Present

LINKEDIN, Remote

- Designed and implemented multi-file coding tasks across JavaScript and TypeScript codebases involving bug fixing, feature development, refactoring, and testing, simulating real-world frontend engineering scenarios
- Wrote clear technical specifications and reference implementations, ensuring alignment between requirements, code behavior, and expected outputs while reinforcing modern best practices

Software Engineer

October 2025 – Present

CROWDDOING, Chicago, IL, USA

- Built and shipped interactive, accessible UI components for the AIME/Imagination Project web application using React and TypeScript, creating reusable component libraries that improved team workflow efficiency by 30%
- Developed responsive data visualization dashboards integrating backend REST APIs, implementing efficient state management, memoization, and data fetching that reduced rendering time by 40%
- Improved application performance by 25% through code splitting, lazy loading, and component-level rendering optimizations, and set up Jest-based unit tests with Docker-driven CI/CD pipelines to maintain quality and cross-browser compatibility

Senior Software Engineer

August 2022 – June 2023

WIPRO TECHNOLOGIES, Bengaluru, KA, India

- Spearheaded the migration of 30+ client-facing applications to AWS hybrid cloud, optimizing responsive design and frontend performance to reduce downtime by 25% and improve user experience across browsers and devices
- Built interactive single-page application components in React with TypeScript, advanced state management, and asynchronous data handling, cutting page load times by 15% and improving Core Web Vitals
- Integrated AWS CodeGuru into CI/CD workflows and led code reviews across multiple web applications, reducing manual review effort by 50%, improving deployment reliability, and mentoring junior engineers on frontend best practices
- Engineered UI/UX enhancements for enterprise React applications with server-side rendering and accessibility improvements, partnering with product managers, designers, and backend engineers in an Agile environment and increasing average session duration by 20%

PROJECTS

GIF Enigma | *React, TypeScript, Redis, Giphy API, Gemini-2.5* | [GitHub](#) | r/PlayGIFEnigma

March 2025 – April 2025

- Engineered a Reddit-native game in React and TypeScript achieving 160K+ views and 1.7K daily users, with strong Lighthouse scores and clean, well-documented code following modern frontend engineering practices
- Designed a dual-mode rendering architecture (inline + expanded) with real-time leaderboards backed by Redis, applying data structure optimization for state management in interactive, data-intensive UI
- Integrated Gemini AI for word generation and hints through a direct HTTP REST API, demonstrating ability to incorporate AI capabilities into a production frontend product

Smart Homes | *React, Java, Jakarta EE, Python, MySQL, MongoDB* | [GitHub](#)

August 2024 – September 2024

- Designed a full-stack e-commerce platform with multi-role access (StoreManager, Customer, Salesmen) using Java Servlets and a React front end, supporting product, order, account, and cart workflows
- Built customer service and recommendation modules integrating OpenAI GPT-4o via LangChain and Python Flask APIs, enabling semantic product search and automated ticket triaging
